# OUR RESPONSIBILITY

---

By adding Slovenia-based offerings to its growing portfolio, the European Safari Company is **contributing to bear conservation and driving nature-based tourism development** in the country's Kočevje region.

While bears remain a heavily managed species in Europe, the increase in bear numbers in Slovenia is underpinning a new trend towards "bear tourism", with the LIFE DINALP BEAR project (a member of Rewilding Europe's European Rewilding Network) **working to change local mindsets and engaging stakeholders** such as local hunting associations, the forestry industry and a range of European tourism partners in the planning and implementation of a bear tourism model.
